

SOURCE CODE

```
#include <iostream>
using namespace std;

/* Finals - Activity 1 - Create a program that consist of array which accept 10
random names
from user then display all the contents of array.
The program must ask the user after if they want to enter a set of names again
(using jump statement).*/

int main()
{
    string name[10];
    char choice;
start:

    cout << "Intir 10 names" << endl;

    for(int i = 0; i < 10; i++){
        cout << "Name " << i + 1 << ": ";
        getline(cin, name[i]);
    }

    cout << "Disney Play" << endl;

    for(int i = 0; i < 10; i++){
        cout << "Name [" << i + 1 << "]: " << name[i] << endl;
    }

    cout << "Do you want to enter another set of names? (y/n): ";
    cin >> choice;
    cin.ignore();

    if(choice == 'y' || choice == 'Y'){
        goto start;
    }
    cout << "BYEE BYEE";

    return 0;
}
```

OUTPUT

```
Intir 10 names
Name 1: Isla
Name 2: Theo
Name 3: Marcus
Name 4: Elara
Name 5: Soren
Name 6: Vivienne
Name 7: Casplan
Name 8: Nadia
Name 9: Felix
Name 10: Seraphine
Disney Play
