

SOURCE CODE

```
#include <iostream>
using namespace std;

/*Finals - Activity 3 - Create a program that will ask for 15 number values then
display the duplicated number values.
Ask again to input another set of 15 number values*/

int main(){

    char choice = 'y';

    while(choice == 'y' || choice == 'Y'){

        int value[15];
        cout << "Enter 15 values to duplicate: " << endl;

        for(int i = 0; i < 15; i++){
            cout << "Number [" << i + 1 << "]: ";
            cin >> value[i];
        }

        cout << "Duplicating Values: " << endl;
        for(int i = 0; i < 15; i++){
            int duplicated = value[i] * 2;

            cout << "Duplicated Values[" << i + 1 << "] " << duplicated <<
endl;

        }
        cout << "Do you want to enter another 15 values? (y) (n): ";
        cin >> choice;
    }
    cout << "Bye byee";
    return 0;
}
```

OUTPUT

```
PS C:\Users\Client\Documents\Activity Finals c++> cd 'c:\Users\Client\Documents\Activity Finals c++\output'
PS C:\Users\Client\Documents\Activity Finals c++\output> & .\'Finals - Activity 3.exe'
Enter 15 values to duplicate:
Number [1]: 5
Number [2]: 6
Number [3]: 3
Number [4]: 4
Number [5]: 7
Number [6]: 8
Number [7]: 9
Number [8]: 2
Number [9]: 1
Number [10]: 4
Number [11]: 5
Number [12]: 6
Number [13]: 7
Number [14]: 4
Number [15]: 56
Duplicating Values:
Duplicated Values[1] 10
Duplicated Values[2] 12
Duplicated Values[3] 6
Duplicated Values[4] 8
Duplicated Values[5] 14
Duplicated Values[6] 16
Duplicated Values[7] 18
Duplicated Values[8] 4
Duplicated Values[9] 2
Duplicated Values[10] 8
Duplicated Values[11] 10
Duplicated Values[12] 12
Duplicated Values[13] 14
Duplicated Values[14] 8
Duplicated Values[15] 112
Do you want to enter another 15 values? (y) (n): n
Bye bye
